HC33-32KLF3 - Local N₂

FLIP (Flat Linear Induction Pump) Solder Bath for Lead-free Wave Soldering

SPRAY FLUXER

Tamura Wave Advantages

Flat Linear Induction Pump (FLIP) solder bath : True Lead-free enabler : Less maintenance

- No moving parts inside solder bath minimizes oxides in solder bath
- 40% less solder dross generated than conventional motor driven solder bath
- Smaller solder bath: requires 30% less initial solder to operate
- Enhanced pre-heating capability with hot air blower
- Solder bath drain heater easily drains solder completely for fast conversion to Lead-free operation
- Solder bath up/down, in/out operation motorized.

Special Features
